PROFESSIONAL SUMMARY

I am a 3rd-year BCA student with hands-on experience in full-stack web development using MERN, Supabase, and PHP/MySQL. I possess strong skills in scalable backend systems, secure APIs, databases, and modern responsive UI/UX design.

EDUCATIONS

Shri Shambhubhai V. Patel College | VNUGU

Jun 2023 - Apr 2026

Bachelor of Computer Applications (BCA)

SGPA : 7.32 First class with Distinction

PROJECTS

VaaniSpace – Voice-Powered Productivity & Private AI SaaS

Mar 2026 - Present

Individual Project

- Building a privacy-first SaaS platform that converts voice input into tasks, habits, reminders, and private diary entries.
- Developed scalable fullstack architecture with Supabase Auth, Google OAuth, Redis caching, and secure Row Level Security.
- Designed a modern SaaS dashboard with real-time analytics, voice workflows, and responsive user experiences.

Technologies / Tools Used : React, Node.js, Express, Supabase, PostgreSQL, Redis, Cloudinary

Swarna Savor - Restaurant Management System (Advanced MERN) | △ Vercel

Dec 2025 - Feb 2026

- Developed a full-featured MERN application with authentication, role-based access (Admin/User), and secure APIs.
- Implemented table booking using React Leaflet, along with cart management, order processing, and Stripe payment integration.
- Created an admin dashboard featuring analytics, invoice generation, and management of bookings and reviews.
- Designed a scalable backend utilizing MVC architecture and REST APIs, alongside a responsive UI with animations.

Technologies / Tools Used : React, Node.js, Express, MongoDB, JWT, Stripe, Recharts

SPYCE - Restaurant Management System (UI-Focused) | △ Vercel

Dec 2025 - Feb 2026

- Developed a responsive MERN platform with authentication, CRUD operations, and REST APIs
- Implemented cart, order tracking, booking system, and admin panel
- Focused on modern UI/UX with clean design and smooth interactions

Technologies / Tools Used : React, Node.js, Express, MongoDB

Vision - Optical E-Commerce System (PHP + MySQL)

Jan 2026 - Feb 2026

- Built e-commerce platform for AI glasses, sunglasses, and eyeglasses
- Implemented login/register, profile management, search/filter, cart, and order flow
- Developed admin dashboard (users, products, orders, analytics, recent activity)
- Designed client-side pages including services and Q&A section

Technologies / Tools Used : PHP, MySQL, HTML, CSS, JavaScript

Journey Junction - Travel Management System (MERN)

Jul 2025 - Sep 2025

- Built a travel booking platform with JWT authentication and protected routes
- Implemented dynamic tour packages and admin-controlled data management

Technologies / Tools Used : React, Node.js, Express, MongoDB

Journey Junction - Travel Management System (PHP + MySQL)

Jul 2025 - Sep 2025

- Developed a full-stack system with secure authentication and booking workflow system that allows users to register, browse tour packages, and manage their booking history.
- Built an admin dashboard to manage users, tour packages, inquiries, support tickets, and dynamic website content.
- Designed a fully responsive user interface with search and filtering features for improved UX.

Technologies / Tools Used : PHP, MySQL, HTML, CSS, JavaScript

SKILLS

Programming Languages : HTML5, CSS3, JavaScript (ES6+), PHP, C, C++, Java, Python

Frameworks & Libraries : ReactJS, Express.js, Node.js, Angular.js, Tailwind CSS

Databases : MongoDB, MySQL, SQLite, PostgreSQL

Tools & Platforms : Git, GitHub, VS Code

Languages : English, Gujarati (Native), Hindi

EXTRA CURRICULUM/ACHIEVEMENTS

- **LeetCode:** leetcode.com/u/RamParmar/
- **Typing Master** – Secured 2nd Position
- **Net Rising** – Secured 2nd Position
